

Double Your Fidelity Nest Egg with Fidelity's Top Independent Expert!

New Report Reveals the Best and Worst Fidelity Funds for 2015

If you already invest with Fidelity or are even considering investing with Fidelity then this is **your call to action**.

I've just released my newest report -- **Fidelity's Best and Worst Funds for 2015**. And it's yours **FREE!** In it I detail the **10 Best Fidelity** funds to buy this year and the 3 funds you must avoid at all costs!

With a stable of 150+ analysts covering 2,600 companies around the globe, Fidelity is well poised to capitalize on opportunities for profit in any market environment. Despite their culture of excellence and innovation, it can be a daunting prospect for investors to navigate their way through Fidelity's labyrinth of products and services. In fact, the average Fidelity investor is actually at a big disadvantage having to plot a course through a complex maze of investment opportunities and some performance pitfalls.

Don't be fooled. Fidelity is in the business of providing excellent investment tools, not building your wealth.

How to Win at Fidelity

Fidelity won't guide you into its best performing funds. They won't tell you which funds to sell. They won't tell you which managers lag way behind their benchmark indices. They won't tell you when a top manager leaves the company. They won't provide you with every manager's performance record.

So how DO you figure all this out by yourself?

As the editor of **Fidelity Investor**, that's where I come in. My name is Jim Lowell and I'm a big cheerleader for Fidelity. I've devoted my entire professional career to studying every nook and cranny inside

Jim Lowell

Jim Lowell is the quintessential Fidelity expert and watchdog. He is the President of FundWorks, Inc. and founding editor of **Fidelity Investor**.

Jim is the author of *What Every Fidelity Investor Needs to Know* and his commentary appears in *Forbes*, *Business Week*, *The Wall Street Journal* and *The New York Times*. He's a regular guest on CNN, CNBC, Bloomberg and Fox Business News.

The *Hulbert Financial Digest* recently named **Fidelity Investor** to its **2015 Newsletter Honor Roll**, citing it for its "above-average performance in both up and down markets."

Fidelity. I'm the Yankee realist who puts every Fidelity investment under the microscope. In fact, I've helped thousands of investors do far better than the average Fidelity investor for the past 18 years. I'll tell you what you need to know — both the good and the bad. And my new FREE report, **Fidelity's Best and Worst Funds for 2015**, is a great place to start.

Doubling your Fidelity Nest Egg

In your free report you'll discover why...

- ❖ Risk-averse, income investors can't do better than this smartly diversified portfolio run by one of Fidelity's top managers, Joanna Bewick.
- ❖ The Health Care sector is one of my favorite sectors for 2015. Eddie Yoon's fund is a no-brainer to add to every investor's portfolio.
- ❖ Joel Tillinghast is a stock-picker par excellence—today's Peter Lynch. His global fund of low-priced stocks has been a star performer since 1989.

Plus, I'll share 7 more top Fidelity funds for 2015 led by the best active fund managers, each delivering better than expected results!

The Power of Active Fidelity Fund Management

Just think, if you had invested \$100,000 in my model **Growth Portfolio** on December 31, 1997, you'd have a whopping \$507,859 at the end of 2014. That's cumulative growth of 408% over a 17-year period that included two major market collapses. **An annualized growth rate of 10% that doubles your money every 7.2 years!**

My **Growth & Income Portfolio** delivers reasonable capital appreciation with less risk than the market. \$100,000 invested in this portfolio on December 31 1997, grew to a substantial \$418,253 at the end of 2014. You'll **double your money every 8.3 years** with this kind of growth!

In fact, the average annualized performance of all four of my model portfolios was a spectacular 13.2% over the past 5 years and a solid 8.5% over the past 10 years!

The key to this top performance? I claim the profits the Index Fund investors are passing up! I know exactly how well every manager performs in every kind of market because my proprietary **Manager Ranking System** tracks each manager's performance throughout his or her entire career.

How to Get Your Free Report
